SUMMARY

Full-stack developer and recent BSIT graduate with hands-on experience building production-ready web applications using React, Vue.js, TypeScript, Node.js, and Firebase. Proven ability to deliver complete solutions — from responsive UIs to backend APIs and database design — across real internship and capstone projects. Eager to contribute to a collaborative team while continuing to grow as an engineer.

TECHNICAL SKILLS

Frontend:	React.js, Vue.js, TypeScript, Tailwind CSS, HTML, CSS
Backend:	Node.js, Express.js, PHP
Databases:	PostgreSQL, Firebase (Firestore, Authentication), Supabase
Tools:	Git, REST APIs, RBAC, SMTP Integration, C#, Lua (Unity3D)
Personal:	Problem Solving, Analytical Thinking, Time Management, Adaptability, Team Collaboration

EXPERIENCE

Full Stack Developer

Feb 2026 – Mar 2026

Kwanii — Cremation Management System

- Developed responsive and dynamic user interfaces using React.js, TypeScript (TSX), and Tailwind CSS.
- Engineered backend solutions with Firebase, implementing authentication, role-based access control, and Firestore operations.
- Synchronized real-time data and integrated frontend applications with diverse backend services and APIs.

Frontend Developer

Feb 2026

PEME — Queuing Management System

- Improved system design and optimized project structure to boost overall development efficiency.
- Built responsive, user-friendly interfaces with React.js and TypeScript, integrated seamlessly with Firebase services.
- Assisted in backend development including Role-Based Access Control (RBAC), SMTP configuration, and feature improvements.

Programmer

Dec 2025 – Jan 2026

Kwanii — Unity3D Chicken War Game

- Collaborated in a 2-person team to prototype an existing game, focusing on scripting, game logic, and dynamic data storage.
- Designed blueprints for game assets and improved game flow by reducing required user interactions.
- Conducted regular debugging sessions to enhance overall user experience.

PROJECTS

Full Stack Developer

Feb 2025 – Nov 2025

Capstone (1 & 2) — ERP System with DSS for Countryside Steakhouse

- Full-stack developer on a 2-person team, building the complete application end-to-end.
- Developed responsive Vue.js components for the dynamic menu and UI; created RESTful APIs with PostgreSQL for menu, inventory, and user data.
- Integrated the frontend with ERP back-end processes, ensuring seamless data flow across all modules.

EDUCATION

National College of Science and Technology

Bachelor of Science in Information Technology (BSIT) | 2022 – 2026

Senior High School – STEM | 2020 – 2022
